

QUEENSLAND TREASURY CORPORATION GREEN BONDS

DNV GL 2019 ANNUAL PROGRAMMATIC ASSURANCE STATEMENT

Scope and objectives

Queensland Treasury Corporation ("QTC" or "Issuer") has issued multiple Green Bond issuances against its pool of eligible projects and assets. From 2018 QTC has elected to conduct its Certified Green Bond Issuance in a Programmatic format as facilitated by the Climate Bonds Standard ("CBS") v2.1.

QTC Green Bonds that have been issued and are outstanding at the time of verification include:

- QTC Climate Bond AUD 750 million ISIN: AU000XQLQAD1
- QTC Climate Bond AUD 1.25 billion ISIN: AU3SG0001928

QTC has used the proceeds of the BOND to finance the nominated projects and assets falling under the following categories:

- Low Carbon Transport
- Solar Energy

Future financing is set to include:

- Water Infrastructure

DNV GL Business Assurance Australia Pty Ltd (henceforth referred to as "DNV GL") has been commissioned by QTC to provide the Annual Programmatic Verification of the BOND as an independent and approved verifier under the Climate Bonds Standard. Our criteria and information covered to achieve this is described under 'Work Undertaken' below.

No assurance is provided regarding the financial performance of the BOND, the value of any investments in the BONDS, or the long term environmental benefits of the transaction. Our objective has been to provide an assessment that the BOND has met the criteria of the Climate Bonds Standard Version 2.1 and the associated Technical Criteria on the basis set out below.

The scope of this DNV GL opinion is limited to the Climate Bonds Standard Version 2.1 and the following associated Sector Technical Criteria:

- Low Carbon Transport (v1.0)
- Solar Energy (v2.1)
- Water Infrastructure (v1.0)

Responsibilities of the Management of QTC and DNV GL

The management of QTC has provided the information and data used by DNV GL during the delivery of this review. Our statement represents an independent opinion and is intended to inform QTC

management and other interested stakeholders in the BOND as to whether the established criteria have been met, based on the information provided to us. In our work we have relied on the information and the facts presented to us by QTC. DNV GL is not responsible for any aspect of the nominated assets referred to in this opinion and cannot be held liable if estimates, findings, opinions, or conclusions are incorrect. Thus, DNV GL shall not be held liable if any of the information or data provided by QTC's management and used as a basis for this assessment were not correct or complete.

Basis of DNV GL's opinion

DNV GL has conducted the verification against the CBS v2.1 and associated Sector Technical Criteria through the creation and execution of a verification protocol addressing each requirement of the CBS v2.1 and the associated Sector Technical Criteria. The detail of areas covered in the DNV GL verification is summarised in Schedule 2 below.

Work undertaken

Our work constituted a high level review of the available information, based on the understanding that this information was provided to us by QTC in good faith. We have not performed an audit or other tests to check the veracity of the information provided to us. The work undertaken to form our opinion included:

Programmatic Verification

- Creation and execution of a Climate Bond Standard Protocol, adapted to include the relevant Sector Technical Criteria for the BOND nominated projects and assets, as described above and in Schedule 2 to this Assessment;
 - Assessment of documentary evidence provided by QTC on the BOND and supplemented by a high-level desktop research, onsite visit for documentation review and interviews with key personnel from the issuer QTC. These checks refer to current assessment best practices and standards methodology;
 - Review and testing of impact reporting data where possible;
 - Discussions with QTC management, and review of relevant documentation;
 - Documentation of findings against each element of the criteria.
-

Findings and DNV GL's opinion

DNV GL has performed the Annual Programmatic Verification of the Queensland Treasury Corporation Green Bonds for 2018. It is DNV GL's responsibility to provide an independent verification statement on the compliance of the Queensland Treasury Corporation Green Bonds with the Climate Bond Standard.

DNV GL conducted the verification in accordance with the Climate Bond Standard Version 2.1 and with International Standard on Assurance Engagements *3000 Assurance Engagements other than Audits or Reviews of Historical Information*. The verification included i) checking whether the provisions of the Climate Bond Standard were consistently and appropriately applied and ii) the collection of evidence supporting the verification.

DNV GL's verification approach draws on an understanding of the risks associated with conforming to the Climate Bond Standard and the controls in place to mitigate these. DNV GL planned and performed the verification by obtaining evidence and other information and explanations that DNV GL considers necessary to give limited assurance that the QTC Climate Bond continues to meet the requirements of the Climate Bond Standard.

Based on the limited assurance procedures conducted, nothing has come to our attention that causes us to believe that the Queensland Treasury Corporation Green Bonds for the 2018 Programmatic period are not, in all material respects, in accordance with the requirements of the Climate Bond Standard Version 2.1 and associated Sector Criteria including Low Carbon Transport, Solar Energy and Water Infrastructure.

About DNV GL

Driven by our purpose of safeguarding life, property and the environment, DNV GL enables organisations to advance the safety and sustainability of their business. Combining leading technical and operational expertise, risk methodology and in-depth industry knowledge, we empower our customers' decisions and actions with trust and confidence. We continuously invest in research and collaborative innovation to provide customers and society with operational and technological foresight. With our origins stretching back to 1864, our reach today is global. Operating in more than 100 countries, our 16,000 professionals are dedicated to helping customers make the world safer, smarter and greener.

SCHEDULE 1: QTC PORTFOLIO OF NOMINATED ASSETS ^{1.}

QTC Green Bond Portfolio Summary for the 2019 Climate Bonds Standard Programmatic Annual Verification.

Categories of eligible projects	Sub category	Project name	Amount Funded/current onlending exposure (\$m) ⁱ	TOTAL allocations from both issues ^{ii, iii}
Low carbon transport	Light rail – electrified trams and supporting infrastructure	Gold Coast Light Rail Stage 1	492.40	283.71
		Gold Coast Light Rail Stage 2	276.00	104.80
	Electrified passenger transport rolling stock	New Generation Rolling Stock (electric)	518.80	162.93
		Tilt Trains rolling stock	31.00	10.00
		Citytrain rolling stock	582.00	175.00
	Electrified rail and supporting infrastructure	Citytrain network	2,779.00	927.00
		Moreton Bay Rail Link	285.70	207.30
		Cycleways - multiple	Cycleways	99.40
Renewable energy	Solar	Sunshine Coast Solar Farm	34.20	30.00
Water infrastructure	Desalination Plant	South East QLD Desal Plant	786.09	0
Total			5,884.59	1,982.34

ⁱ Amount funded is the total State funded contributions to projects and/or the outstanding amount of QTC loans to government entities (as applicable) as at 31 December

ⁱⁱ Net proceeds from QTC March 2024 Green Bond were \$748,710,000 from \$750,000,000 Face Value of bonds issued

ⁱⁱⁱ Net proceeds from QTC March 2029 Green Bond were \$1,233,625,000 from \$1,250,000,000 Face Value of bond issued

SCHEDULE 2: VERIFICATION CRITERIA

Summary criteria for assertions of compliance with the Climate Bond Standard v2.1

The criteria against which QTC and its nominated projects and assets have been reviewed prior to inclusion in the Bond are grouped under the requirements as detailed within the Climate Bond Standard Version 2.1 including:

Part A: General Requirements

Area	Requirement
Project Nomination	The Climate Bond issued must specify the project collateral or physical assets with which it is associated
Use of Proceeds	Proceeds must be allocated to Nominated Project(s)
Non-Contamination	Issuers are permitted a grace period to allocate or re-allocate funds to Nominated Project(s)
Confidentiality	The information disclosed to the Verifier and the Climate Bond Standards Board may be subject to confidentiality arrangements
Reporting	Reporting on use of proceeds and nominated projects and assets

Part B: Low Carbon Contribution - Eligible projects and physical assets

Nominated projects and assets include financing of or investments in equipment and systems which enable the mitigation of greenhouse gasses, as detailed in Appendix B.

Area	Requirement

Low Carbon Transport	All infrastructure, infrastructure upgrades, rolling stock and vehicles for electrified public transport pass this criterion, including electrified rail, trams, trolleybuses and cable cars. Dedicated cycle ways and bicycle paths.
Solar Energy Generation	Solar electricity generation facilities
Water Infrastructure	Determination of mitigation contribution, if any. Completion of the Adaptation and Resilience Scorecard with a score of >60% in each of section 1-4.

Part C: Bond structures

Area	Requirement
Project Holding	The issuer of a Corporate Climate Bond with Nominated Projects linked to a portfolio of assets must continue to hold eligible assets at least equal to the Fair Market Value at the time of issuance of the original principal
Settlement Period	Climate Bond issuing entities must demonstrate that the proceeds of a Climate Bond have been allocated to the Nominated Project(s) within 24 months after the bond is issued
Earmarking	The Issuer of the bond shall maintain the earmarking process to manage and account for funding to the Nominated Projects & Assets

ⁱ Amount funded is the total State funded contributions to projects and/or the outstanding amount of QTC loans to government entities (as applicable) as at 31 December

ⁱⁱ Net proceeds from QTC March 2024 Green Bond were \$748,710,000 from \$750,000,000 Face Value of bonds issued

ⁱⁱⁱ Net proceeds from QTC March 2029 Green Bond were \$1,233,625,000 from \$1,250,000,000 Face Value of bond issued
